

Rapid Ambient AI Adoption at a Leading Academic Medical Center

University of Iowa Health Care is Iowa's leading academic health system, offering comprehensive adult and pediatric primary and specialty care. With nearly 20,000 staff, including 1,200+ physicians, it has implemented Nabla's AI assistant system-wide to streamline documentation and reduce administrative burdens.

Roll out

Advanced practice providers (APPs) Psychiatry

Neurology Emergency Gynaecology

Total providers 1,500+ (ongoing rollout)

Monthly notes generated 7,000+

EHR integration **Epic**

Outcomes*

100% adoption with a 75% week-over-week engagement score.

26% drop in burnout compared to pre-implementation burnout rate.

4.3/5 clinical note rating, with 60% of the notes rated above 4.

*Following a 5-week deployment of Nabla's ambient AI

Why they chose Nabla

UI Health Care's team evaluated 2 other solutions prior to selecting Nabla.

Onboarding support

Nabla's team went on-site to onboard providers, assist in adoption, and gather real-time feedback.

Development potential

Ability to develop tailored features for nurses and other healthcare professionals, adapting to their unique clinical documentation workflows.

AI-powered customization

Including features such as magic edit to seamlessly tailor notes to each clinician's preferences.

"New technology can be readily adopted by a large number of providers without excessive encouragement, as long as it meets their needs and is easy to use. Nabla was by far the easiest technology we've implemented into our EHR."

James Blum, MD

Chief Health Information Officer and Associate Professor of Anesthesiology
